Side Channel Removal Tool
Install Tool

INSTALLATION - Side Channels (Outside Mounting)

Note: Install the Nano Box shade prior to installing Side & Sill Channels.

Predrill holes 3" from each end and add few more holes approximately 12" apart over length.

Rear mounting will be used on outside mount installations.

1 Install channels under the box shade, aligned to the edge of the end caps. Secure channels to wall with included screws in each of the drilled holes. Repeat same for opposite side of window.
INSTALLATION - Side Channels (Outside Mounting)

2 Roll down the shade, checking to ensure the fabric doesn't drag or rub th einside of the channel.
Install the covers.
INSTALLATION - Side Channels (Outside Mounting)

3 To secure the covers, use the supplied install tool. Using a mallet, tap the tool to snap the outside extrusion into the mounted extrusion.
Note: This could take quite a bit of force.

Once started work your way down continuing to tap the tool to seat the extrusion
Repeat for the other side.

INSTALLATION - Sill Channels (Optional)

4 Optional - Install the sill channel at the bottom
Secure the channel covers to wall with included screws in each of the drilled holes.

REMOVAL - Side & Sill Channels (Outside Mounting)

5 If a need arises to remove the extrusion, use the side channel removal tool.

Make sure the shade is rolled up to prevent damage.

Starting at the top or bottom, insert the tool into channel at an angle as shown. Make sure the tool is as far into the channel as possible and pry the channel apart by rotating the tool down. Repeat every few inches untill the side channels are fully seperated.
